Dear sir/madam,

Hello there ! It's vengadesh waran.B . I was a student pursuing my 3rd year in Bachelor's in computer Science and Engineering at Trichy Engineering College at Trichy. Now i'm entering into my 5th semester with 7.6 CGPA.

Because of getting passionate about data science and data analyst role i've been continuously learning about this field. i had a good knowledge in python, machine learning, python libraries, excel, power bi, tableau, exploratory data analysis and analytics skills.

i had an experience of completing 1 month internship as a data analyst in vdart trichy. so there i've learned what are the responsibilities of a data analyst and relevant skills to develop. In my college days i've been practising lots of data analytics project over internet and upskilling my knowledges.

Now i'm applying for INTERNSHIP as an data analyst . So i'm sure that i'm completely suitable for this internship program . So thanking you.....

Regards,

[Vengadeswaran] [B]
